

Cloud & DevOps Engineer

About Us

Hello! We are Cloudar, a Belgian Managed Service Provider offering rock solid cloud solutions for any type of business.

We design, build and operate high available and scalable cloud environments based on Amazon Web Services (AWS).

Want to join our team?

Are you interested in working as a Cloud & DevOps Engineer working with Linux, Unix or Windows, and do you understand the advantages of working in a highly distributed virtual environment?

If you are, Cloudar is looking for you....

To help us support our growing demand of Cloud services, we are actively seeking for several motivated individuals (recent graduates and senior profiles) to join our troops.

You will be part of a team that's constantly pushing innovative ideas and you'll be surrounded by people who are wickedly smart, passionate about cloud computing and believe that world class support is critical to customer success.

Still interested? Read on ...

You'll fit in if you're:

- able to operationalize and manage large-scale distributed infrastructures in the cloud
- open to good ideas, wherever they come from (we're open to your good ideas too)
- not afraid to roll up your sleeves: This role will evolve over time, and we want you to evolve with it!
- able to build and design state-of-the art scalable cloud solutions
- interested in debugging production systems, isolate and resolve problems quickly
- able to automate deployments, monitoring, backups, disaster recovery

Things we play with:

- Amazon Web Services (obviously)
- CloudCheckr, New Relic, CloudWatch ...
- Ansible, Puppet, Chef, Cloudformation, Terraform
- Docker
- OpenStack
- Ruby/Python/PHP/...
- Various OS'es: CentOS, Ubuntu, RedHat, and yes even Windows
- Networking and core Internet protocols (e.g. TCP/IP, DNS, SMTP, HTTP, and distributed networks).
- Different database technologies, including SQL, MySQL, DynamoDB and NoSQL databases
- Web platforms like Drupal, Hybris, Intershop, Adobe Experience Manager, ...

What can you expect?

We won't leave you hanging. You'll get the support you need to develop yourself, but we do expect you to be able to work independently. Your coworkers are savvy, innovative, and (at least in our opinion) pretty funny. And, while we may seem laid-back when you meet us, just wait until you see us at work!

Off course you'll get:

- A competitive salary in relation to your professional experience
- Stuff to do your work: Laptop, Smartphone...
- Company car with fuel card
- Health insurance
- Work @Home possibilities
- Training & Education
- The best colleagues you'll ever find

Interested?

Send your cv to jobs@cloudar.be, contact us through our website (www.cloudar.be) or through social media

We look forward to hear from you!
